

LEADING THE WAY IN VARIABLE MESSAGE SIGNS

**RELIABLE PERFORMANCE**

IN VARIABLE  
MESSAGE SIGNS

**ROTAPANEL**

**VARIABLE MESSAGE SIGNS**

**DURABLE AND RELIABLE  
IN EVERY CONDITION**

RotaPanel variable message signs are reliable under almost all weather conditions. Polar cold or desert heat, a RotaPanel will never let you down. Its rugged design and state-of-the-art and proven technology guarantee maximum operating reliability at minimum maintenance and cost.

**THOUSANDS OF ROTAPANELS IN 40 COUNTRIES NEVER GIVE UP**

RotaPanel variable message signs require minimal maintenance and operate swiftly and effectively.

**WIRED OR WIRELESS  
FOR IMMEDIATE OPERATION**

**ROTAPANEL**  
VARIABLE MESSAGE SIGNS

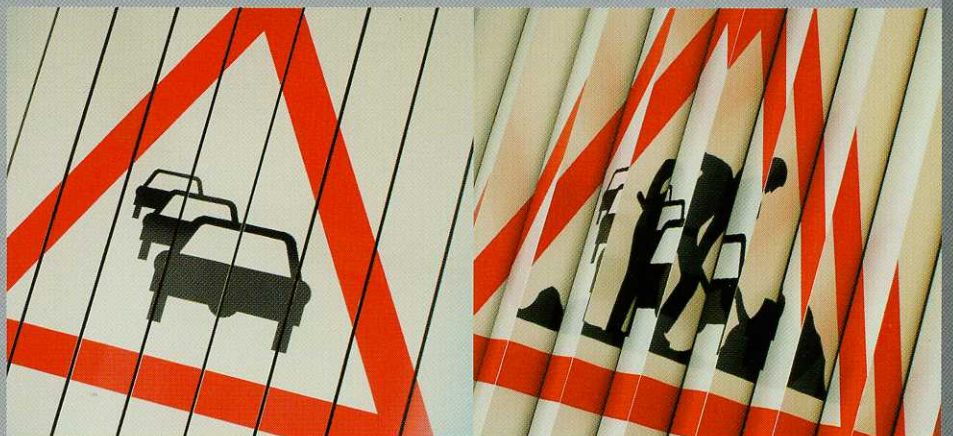

#### **LONG-LASTING CAREFREE OPERATION**

RotaPanel variable message signs keep on turning... for many, many years. For decades, they have demonstrated that the quality of the tiniest component meets the highest standards. The patented prism positioning creates a flat surface, even after many years of use.

## PROVEN QUALITY AND MINIMUM MAINTENANCE

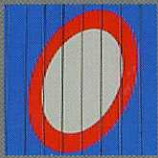

**EACH PRISM HAS ITS OWN PARALLEL DRIVE AND BLOCKING DEVICE**

The RotaPanel prisms run smoothly because of a unique, self-lubricating drive system. Thanks to a Rotapanel's extremely low energy consumption, it is extremely suitable for solar-powered operation.

THE EXTREMELY LOW INTERNAL  
FRICTION ENSURES LIABILITY

#### **40 YEARS EXPERIENCE IN OUTDOOR MEDIA**

Globally, the number of RotaPanels is on the increase. Modern CNC processing centres and expert engineers take care of the in-house production of variable message signs. Constructed of the highest quality aluminium and stainless steel.

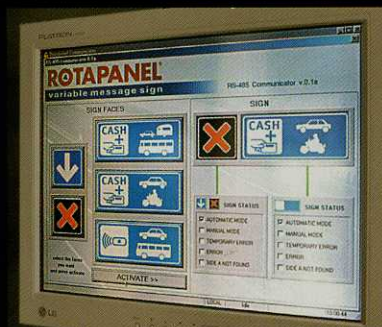

## LEADING THE WAY IN VARIABLE MESSAGE SIGNS

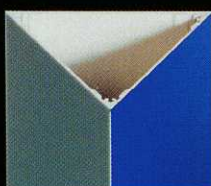

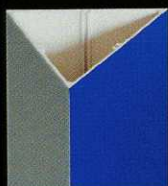

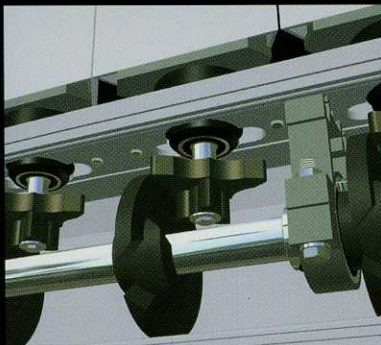

*RotaPanel variable message signs may be subdivided into several sections, each of which is equipped with its own motor and control. This allows you to communicate different messages on a single RotaPanel. The number of possible sections is unlimited.*

*You may control your variable message sign on-line by personal computer, or wireless by GSM cell phone. Thanks to the open software architecture, the panels may be customised to your specific requirements.*

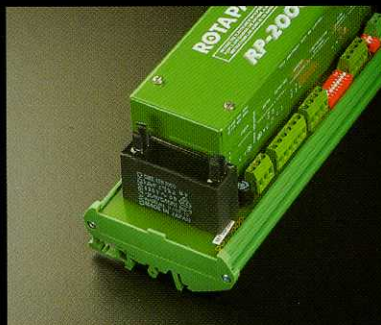

*RotaPanel delivers three different prisms: of 100, 125 and 160 mm wide. The maximum length is 4,750 and 6,000 mm, depending on the prism width.*

#### *Patented RotaPanel Drivesystem*

- Very low friction!
- Starts without load
- Self-lubricating thanks to addition of 15% PTFE!
- Almost no stick-slip!

- CE approved
- Standard control: -RS 485  
-Manual
- Optional control: -Profibus  
-Parallel isolated IO
- Feedback
- 110 Vac/230 Vac 24/Vdc
